OBJECTIVE

Software Engineering undergraduate (Batch 2027) specializing in Full-Stack Development and AI/ML. Hands-on experience building scalable applications with React, Node.js, Python, and Flask, with deep exposure to LLMs, RAG pipelines, and cloud deployment. Strong OOP fundamentals and 350+ DSA problems solved in C++ . Seeking a Software Engineering Internship to contribute across modern tech stacks while growing in a collaborative, fast-paced environment.

EDUCATION

Jaipur Engineering College and Research Centre (JECRC)
B.Tech – Data Science & Artificial Intelligence | CGPA: 7.99

Expected May 2027
Jaipur, India

Paradise Public Sr. Sec. School | Class XII: 76.00% | Class X: 79.50%
Rajasthan Board of Secondary Education

2020 – 2022
Behror, Rajasthan

TECHNICAL SKILLS

Languages: Python, C++ (OOP), JavaScript, TypeScript

Web & Backend: React.js, Node.js, Express.js, Flask, REST APIs, Microservices, Tailwind CSS, JWT, WebSockets

AI / ML: LLMs, RAG Pipelines, Prompt Engineering, Vector Databases, IBM Watsonx, Gemini API

Cloud & DevOps: IBM Cloud, Vercel, Docker (Basics), Git, GitHub, Postman, Scalable System Design

EXPERIENCE

Frontend Development Intern

July 2025 – Aug 2025

GoGetWell.ai

Remote

- Built scalable frontend components with **React**, **TypeScript**, and **Tailwind CSS**; streamlined deployment using **Docker** containerization.
- Implemented **Zustand** state management and collaborated with backend engineers to integrate REST APIs, improving overall application performance.

Web Development Intern

Aug 2024 – Sep 2024

Bharat Intern

Remote

- Delivered responsive React.js applications with 100% cross-browser compatibility, applying OOP-based component architecture and clean code practices.
- Reduced page load times by **20%** through code splitting and asset optimization in an agile development workflow.

PROJECTS

Code4Care – AI Hospital Surveillance | [Live](#) | Python, Flask, React

Mar – Apr 2026

- Engineered an end-to-end hospital infection tracking system with a **3D Digital Twin** for real-time spatial monitoring and administrative insights.
- Integrated AI-based anomaly detection to identify infection clusters, improving analytical response time for critical healthcare workflows.

LoanAgent – IBM AI Bank Agent | [GitHub](#) | Python, Flask, IBM Watsonx, RAG

Oct – Nov 2025

- Architected an AI loan verification system using **IBM Watsonx**, achieving **85% accuracy** in automated eligibility validation.
- Engineered ReAct-based agentic workflows with **prompt engineering** and a **RAG pipeline**, cutting manual verification time by **95%**; deployed on **IBM Cloud**.

Nyay-Darpan – Govt. Land Rights Portal | [Live](#) | React.js, Appwrite, LLMs

Aug – Sep 2025

- Built a citizen-facing government portal in **React.js** and **Appwrite** to digitize “Patta” land-rights issuance workflows at scale.
- Integrated an **LLM-based AI document validation** module, reducing manual verification errors by **80%**; deployed on Vercel.

ACHIEVEMENTS, LEADERSHIP & CERTIFICATIONS

- **Hackathon:** Secured **Top 5 Rank** at Smart India Hackathon (SIH) Inter-College Competition for building an innovative full-stack web solution.
- **DSA:** Solved **350+ problems** in C++ on [LeetCode](#) & [GeeksforGeeks](#) | **4-Star Python Badge** on HackerRank.
- **Mentorship:** Mentored **50+ students** in Python and OOP as Core Tech Mentor at JECRC's Dept. of AI & Data Science.
- **Certifications:** Machine Learning – NPTEL, The Joy of Computing using Python – NPTEL, Python Programming – GeeksforGeeks, Introduction to C – NPTEL
